The project at a glance

During the Corona pandemic, laptops and tablets have become essential for studies and work. Digital and social participation are merging. Yet, there are not always enough devices available.

Digiteers is a volunteering project. Together with our volunteers and our partners, we want to give families in need access to digital consumer devices and foster digital participation.

For this

- we collect donations of devices and money

- refurbish devices and install the necessary software

- lend devices to families

- offer a short introduction on how to use these devices

Do you need a laptop?

Send us an email to digiteers@stadt.nuernberg.de.

Rental devices for students are regularly distributed via schools!

Please request a regularly device from your school first.

Would you like to donate a laptop?

We collect laptops from companies and individuals on a donation basis.
