# Vorbemerkung

## Zensus 2011 - Nürnberg

Am 28.05.2014 hat das Bayerische Landesamt für Statistik und Datenverarbeitung die endgültigen Ergebnisse des Zensus 2011 für alle bayerischen Gemeinden veröffentlicht, also mehr als drei Jahre nach dem Stichtag 09.05.2011. Die Bevölkerungszahl für Nürnberg zum Stichtag und letztlich auch die Daten zu einzelnen Bevölkerungsgruppen wurden durch eine auf einer Hochrechnung basierenden Schätzung gewonnen. Dabei wurden Einwohnerzahlen errechnet, die stark von den Beständen im Melderegister abweichen, weshalb die Stadt Nürnberg, wie 53 weitere Kommunen in Bayern, gegen die Zensusdaten Klage eingereicht hat.

Dem Nürnberger Amt für Stadtforschung und Statistik wurden als abgeschotteter Statistikstelle im Herbst 2014 daneben auch die zugrundeliegenden Einzeldaten zur Verfügung gestellt, aus denen tief gegliederte kleinräumige Ergebnisse erstellt werden können. Allerdings sind diese kleinräumigen Zensusergebnisse nicht nur wegen der zu niedrigen Bevölkerungszahl, sondern auch wegen zu großer inhaltlicher Abweichungen von den sonstigen Statistikdaten kaum als Planungsgrundlage nutzbar. Dennoch sieht sich das Statistikamt verpflichtet, diese Daten zu dokumentieren und damit Verwaltung, Politik und der interessierten Öffentlichkeit zugänglich zu machen.

In dieser ersten Veröffentlichung werden Strukturdaten der Bevölkerung am Hauptwohnsitz für die Nürnberger Distrikte abgedruckt. Weitere Veröffentlichungen zu Haushalten, Gebäuden und Wohnungen werden folgen.

Um die statistische Geheimhaltung zu gewährleisten, sind Tabellenfelder mit Fallzahlen bis zu 3 Personen besonders behandelt worden.

Es bedeutet     0: Fallzahl 0 oder 1  
                     3: Fallzahl 2 oder 3

Aus diesem Grund können sich Differenzen bei der Summierung einzelner Werte ergeben.

Da bei 544 Datensätzen keine kleinräumige Zuordnung möglich war, sind bei diesen die Tabellenfelder gepunktet, die Daten sind aber im Gesamtstadtergebnis enthalten.
